

COURSE DESCRIPTION

Storage System Provisioning with Hitachi Ops Center Administrator

1089CI

Who Should Attend

- Storage Administrator

Availability

- Customer
- Partner
- Employee

Level

- Professional

Required Knowledge and Skills

- Experience working with Hitachi Ops Center products and servers (Windows or UNIX)
- Experience using VMware Hypervisor and vCenter

Supplemental Courses

- Managing Hitachi Ops Center Automator – TSI2690
- Managing Hitachi Ops Center Analyzer – TXI3684
- Managing Hitachi Ops Center Protector – TSI2995

Delivery Type

- Instructor-led
- Virtual Instructor-led

Course Length

- 2 days

Start provisioning your Storage system with Hitachi Ops Administrator

This intermediate course is focused on providing comprehensive information to perform provisioning tasks with Hitachi Ops Center Administrator on Hitachi Storage systems. These tasks include storage setup and configuration (onboarding and discovering storage), creating parity groups, pools, volumes, and LUNs (provisioning volumes to the host), managing and creating Volume Protection. This course helps you to perform Installation and upgrade of Hitachi Ops Center suite, including Administrator. The course also explains how to manage and monitor storage from the Hitachi Ops Center Administrator Dashboard.

The course includes hand-on lab activities to give you practice on how to use Ops Center Administrator and its features.

Learning Path: [Hitachi Ops Center](#)

Digital Badge

At the successful completion of this course, you will receive the **Storage System Provisioning with Hitachi Ops Center Administrator** digital badge.

Course Objectives

When you complete this course, you should be able to:

- Use the Hitachi Ops Center Administrator Dashboard to add storage systems
- Explain how to create parity groups, pools, and volumes
- Perform Installation and upgrade of Ops Center Administrator software
- Describe the workflows for onboarding, configuring, creating, and attaching volume
- Use Hitachi Ops Center Administrator Dashboard for cloning and snapshot to protect a volume
- Explain how to discover storage systems, servers, and fabric switches
- Explain the Virtual Storage Machine (VSM) concept and its applications in Hitachi storage systems

Course Outline

Content Modules

- Overview
- Installation and upgrades
- Resources Discovery
- Parity Groups and Pools Setup
