

Hitachi VSP 5000 Series Hands-On Training THI3857

COURSE DESCRIPTION

Delivery Type

- Instructor-led Training (ILT)

Duration

- 2 days

Course Availability

- Employees
- Partners

Target Audience

- Pre-Sales
- Architect
- Install and Support

Required Knowledge and Skills

- Knowledge of the legacy Hitachi VSP storage systems

Prerequisites

- **TXP3893-3** - Hitachi Virtual Storage Platform 5000 Series Differences Training Deep Dive

Supplemental Courses

- Additional online courses are part of the NEXT Horizon and VSP 5000 Series release training

Course Description

This course provides an introduction to the new Hitachi VSP 5000 Series. It focuses on the overall hardware architecture as well as highlights the hardware differences from the previous VSP storage systems. In addition, this course walks through how to initially install the storage system. This course is 100% hands-on practice on the VSP 5000 Series hardware.

You must complete the prerequisite course TXP3893-3 before you attend THI3857. TXP3893-3 covers all of the specifications of the VSP 5000 Series equipment, as well as the differences from prior VSP versions.

Note that THI3857 is designed for those who have prerequisite knowledge of legacy Hitachi VSP storage systems.

This course prepares you for the following Hitachi Vantara Qualified Professional qualification test:

- Hitachi Vantara Qualified Professional – VSP 5000 Series Installation (HQT-4160) Exam

Depending on the location and course delivery format, this closed-book, proctored qualification test may be offered and administered by the instructor at the conclusion of this course, using the [Kryterion Webassessor system](#). It is also available at Kryterion testing centers.

Course Objectives

When you complete this course, you should be able to:

- Verify the actual locations of physical components in the hardware
- Discuss questions about the observed locations of physical components
- Use maintenance manual information to dummy replace parts including:
 - Controller
 - Memory DIMMS
 - CHBs
 - DKBs
- Perform a microcode update
- Install drives and create parity groups according to instructions
- Practice rebuilding the initial build subsystem if the subsystem fails
