

### Delivery Type

- Instructor-Led Training (ILT)

### Course Length

- 1 day

### Course Availability

- Customers
- Partners

### Suggested Audience

- Developers
- Architects

### Required Knowledge and Skills

- Understanding of Java or C/C++ or C-#
- Understanding of network programming
- Understanding of virtualization environments
- Basic understanding of Command Line usage (that is, MS-DOS and/or Bash)

### Prerequisite Courses

- None

### Supplemental Courses

- None

## TSI2764 – Hitachi Content Platform Solutions for Developers

### Course Highlights

- Explore Hitachi Content Platform (HCP) application capabilities
- Learn about REST-ful programmatic APIs for HCP management and object usage

### Course Description

This 1 day instructor-led course provides application engineers with the basic knowledge necessary to code applications that take advantage of the Hitachi Content Platform (HCP) solution. It familiarizes you with key principles required to program REST-ful programmatic APIs for HCP.

You will complete hands-on lab activities designed to reinforce the principles presented during the course.

### Course Objectives

Upon completion of this course, you should be able to:

- Describe the HCP capabilities relevant to application engineers, including object lifecycle policies, background processes, and programmatic access
- Explain REST-ful programmatic APIs for HCP management and object usage (read/write/search)
- Perform tasks associated with a private HCP-VM environment

### Course Outline

#### Content Modules

- Hitachi Content Platform Capabilities
- REST-ful Programmatic APIs (Java,C/C++,C#)
- HCP-VM Environment

#### Learning Activities — Labs

- Basic Configuration of HCP Tenants, Namespaces and Data Access Account
- Use Command Line Utility to Execute Basic Data Access, Management API, and Metadata Query API
